1994 Index Of Articles

Features

Operating Systems

"What's New In 4.4BSD," Marshall Kirk McKusick, Jan., 51-56.
"Farewell To Berkeley UNIX," Peter H. Salus, May, 38-44.
"Networking Comes To UNIX," Marshall Kirk McKusick, May, 40.
"BSD Goes To Bell Labs," Bill Joy, May, 42.
"How TCP Became Smarter," Mike Karels, May, 43.
"A Word Of Tribute," Dennis Ritchie, May, 44.
"Memory Allocation Under SVR4," Stephen M. Mullaney, July, 47-54.
"Put Multiprocessing Systems To Work," Stephen Walter, Dec., 43-49.

System Administration

"Keeping Internet Intruders Away," James Ellis, Barbara Fraser, and Linda Pesante, Sept., 35-44.
"Creating New terminfo Entries," Ernest H. Rice III, Sept., 47-52.
"Accessing Alternate Character Sets," Ernest H. Rice III, Nov., 47-51.

Distributed Computing

"Writing DCE Programs," John Shirley, Jan., 35-49.
"Working With Sockets," Antoinette Agracewicz, June, 44-51.
"XDR: Moving Data Between Platforms," Stephen Rago, June, 55-62.
"Windows Sockets," David P. Jablon, Oct., 37-44.
"Network Information Service+," Arshad Noor, Oct., 47-54.

Programming

"Exception Handling In C++," Bruce Eckel, Feb., 38-51.
"Writing Reusable Classes In C++," David R. Reed, Feb., 53-60.
"A Developer's Look At The COSE Desktop," Cindy Starks, Mar., 41-45.
"The CDE Libraries," Michael Moore, Mar., 53-57.
"C++ In Embedded Systems," Kenneth F. Greenburg, Apr., 38-43.
"XIE: The New X Image Extension," Syd Logan, Aug., 29-37.
"Programming In Display PostScript," John Pew, Aug., 41-47.
"New In Perl 5.0," Carl Dichter and Mark Pease, Nov., 39-42.

Other

"From OpenWindows To CDE," David Bryant, John Fowler, and Rick Levine, Mar., 47-51.
"Hard Real Time vs. Soft Real Time," Jerry Fiddler, Apr., 47-51.
"Proper Proc Docs," Carl Dichter, July, 39-45.
"Outstanding Products Of 1994," *UNIX Review* Staff, Dec., 37-41.

Reviews

Programming Tools

"Programming Editors," Andrew Binstock, Jan., 58-64.
"Speed Generator," Dave Pare and Jonathan Lee, Mar., 67-69.
"Crisp v. 4.1.2," Amy H. Johnson, May, 61.
"CenterLine's TestCenter," Bjorn N. Freeman-Benson, June, 71.
"SunPro Workshop For C++," Steve Manes, Aug., 51-57.

System Administration

"PC X Servers," Chris Guthrie, May, 47-59.
"Legato NetWorker," Ronald Hixon, June, 65-69.
"HP's OpenView Network Node Manager," Ronald Hixon, Nov., 55-64.

Workstations

"SGI's Indy," Amy H. Johnson, Mar., 58-65.
"PowerPC Premieres," Amy H. Johnson, Apr., 55-61.
"The Hewlett-Packard Model 712/60," Max Schireson, Oct., 57-61.
"The Sun Voyager SPARCstation," David Wilson, Dec., 51-57.

Servers

"NCR 3455," Amy H. Johnson, Feb., 63-68.
"Motorola Series 900," Max Schireson, Sept., 55-59.

Operating Systems

"SCO ODT 3.0," Mark Davidson, Jan., 67.
"Solaris x86," David S. Linthicum, Feb., 71-74.
"Windows NT," Randall C. Kennedy, Apr., 63-66.

Technical Publishing

"FrameMaker 4," Michele Vening, Apr., 69.

X Terminals

"X Terminals," Amy H. Johnson, July, 58-64.

"A Spin Around The Block," Aug., 67-74.
"Big Numbers," Nov., 77-85.
"The Littlest Keyboard," Dec., 65-69.

The No-Risk, Low-Cost, Never Obsolete, Works With Everything, Network Guarantee:

TinyTERM Plus **PC TO UNIX NETWORKING.**

TinyTERM Plus. Don't let the name fool you. There's nothing tiny about what TinyTERM Plus does for DOS and Windows to UNIX networking: network printer sharing, visual file transfer, network file sharing, and exact terminal emulations - in addition to a full TCP/IP implementation, are all included in one package.

- COMPLETE PC-UNIX NETWORKING
- LPR NETWORK PRINTER SHARING
- NFS NETWORK FILE SHARING
- FTP VISUAL FILE TRANSFER
- TELNET TERMINAL EMULATION INCLUDING WYSE 60, AT386, SCO ANSI AND VT320
- INCLUDES WOLLONGONG TCP/IP AND SUPPORTS MANY OTHER TCP/IP NETWORKS
- SUPPORTS DOS AND WINDOWS
- 5 USER LICENSE, $395

GOOD NETWORK INVESTMENT. INTERNET STANDARD.

TinyTERM Plus helps guarantee your network investment by not locking you into one specific network vendor. By combining support for many other popular TCP/IP packages, and adhering strictly to Internet standards, TinyTERM Plus creates a network foundation which allows upward compatibility with other network vendor solutions.

LOW COST, HIGH PERFORMANCE.

TinyTERM Plus is available in two versions: TinyTERM Plus, including terminal emulation, visual file transfer, and TCP/IP is $79 per user, or about one-fourth the cost of networking a user today. TinyTERM Plus/NFS, at $159 a user, includes a full LPR/LPD standard print client/server for DOS, Windows and UNIX without the need to run NFS. This allows users to print from any computer on the network to any printer on the network. All printers, including PostScript, are fully supported.
